2124 Programming with C Sharp				2400 Implementing and Managing Microsoft Exchange Server 2003				5050 Recovering Messaging Servers and Databases Using Microsoft Exchange Server 2007							
The goal of this course is to provide students with the knowledge and skills they need to develop C Sharp applications for the Microsoft .NET Platform. The course focuses on C Sharp program structure, language syntax, and implementation details.				This course provides students with the knowledge and skills that are needed to update and support a reliable, secure infrastructure.				In this course, students will learn how to manage messaging and connection security. They will also learn how to manage spam, anti-virus, and content filtering. And finally they will learn how to install and configure a gateway server.

This course will teach Microsoft Windows 2000 operating system administrators how to take advantage of Windows Script Host (WSH) by using the Microsoft Visual Basic Scripting Edition (VBScript) language.				This course provides Exchange 2000 Server or Microsoft Exchange Server 2003 administrators with skills needed to manage a Microsoft Exchange Server 2007 infrastructure. The course focuses on new features and administrative tasks in Exchange Server 2007.				Students will learn how to perform full and dial-tone recoveries of a mailbox server, as well as repair a mailbox database. They will also learn how to perform a full recovery of Client Access servers, Hub Transport servers, and Unified Messaging Servers.

This course combines five days worth of training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008.				Preliminary Outline) This course teaches students how to implement and manage Windows Server 2008 Hyper-V. It also teaches students how to manage Hyper-V with Solution Center Virtual Machine Manager (SCVMM) and with PowerShell.				This course provides the knowledge and skills that IT Professionals need to configure identity and access solutions with Windows Server 2008 Active Directory.
