Houston, TX 77056

Mr. Keys,

I want to share my wonderful experience I had at New Horizons Learning Center. My instructor Taran Grace is a gifted and knowledgeable instructor as she guided the class through the exercises with confidence and ease. When you attend a class at New Horizons Learning Center you do not just sit and click the buttons along with the instructor you actually understand what you are learning and how to apply it to your own company's data. I firmly believe that not only does the instructor have to be expert with the training material but they must be able to teach as well. You are able to actually use the programs learned with confidence when you return to your job. This is the best course I have ever attended and I have been to several other classes taught by other well known computer learning centers in Houston and there is no comparison.

I highly recommend New Horizons Learning Center to anyone who has a desire to learn a program and have the confidence to use the skills learned.

I plan on taking many more courses at New Horizons Learning Center they are excellent!

Regards,
